

Summary of publication in PharmInd. 78, Nr. 8, 1096 – 1098 (2016)

Supplier audits are an essential element of a pharmaceutical quality assurance system. Considerable costs are involved, on the part of the pharmaceutical manufacturers, as well as the audited suppliers of materials and services. JAVfX is an initiative to perform joint audits by two of their members and share the audit reports with all interested members. This system is well implemented since 15 years.
